AFC Insurance Announces New Upgrade to Green Enhancement for Social Service Risks

November 4th, 2008 Bethlehem, PA- AFC Insurance (AFC), an industry leader in the social service insurance arena, unveiled their new **UPGRAGE TO GREEN coverage enhancement** for the **social service industry**. These new product enhancements will allow AFC's customers to be assured that they will be able to replace damaged property with socially responsible GREEN alternatives if their covered premises are damaged by a covered peril. What this means for our agents is a state of the art product with much better coverage for their customers.

AFC has worked hard with their carrier to deliver this cutting edge enhancement. To our customers, it will mean a cost savings with improved replacement systems and a better resale value of those properties because of the GREEN systems.

AFC Insurance offers real solutions for businesses providing social services, addiction rehabilitative services, services for the developmentally disabled and mental health arenas. AFC products are available exclusively through independent agents and brokers. For more information, contact us today, or visit on the web at www.afcins.com.
